Dear Guangrui Fan, Lihu Pan, Menglin Zhang, Minxia Zhao,

Paper ID: 10330

Title: LePER: Label-Free Edge Polarity Reweighting for Heterophily

Congratulations!

We are pleased to inform you that the above-listed manuscript has been accepted for presentation at IEEE ICASSP 2026 (<https://2026.ieeeicassp.org>), which will be held as an in-person event in Barcelona, Spain, from May 4 to 8, 2026.

Over the past few months, the IEEE Signal Processing Society's Technical Committees worked very hard reviewing the 11,120 papers submitted to ICASSP 2026. This was the largest and most comprehensive ICASSP in IEEE SPS history. Expert reviewers evaluated submissions in their areas of expertise, resulting in a highly competitive selection process with an acceptance rate of about 40%.

Thank you for contributing to IEEE ICASSP 2026! To celebrate your paper acceptance, we've created a shareable graphic you can use to promote your work and invite your network to attend. Use this link to spread the word across LinkedIn, X, Slack, WhatsApp, email, and more: <https://app.gleanin.com/share/c/43733>

The reviewers' comments on your paper are attached at the end of this email. If appropriate, feedback from the leadership group of the Technical Committee (TC) is also included after the reviewers' comments. These comments served as part of the basis for the final decision. Please consider the reviewers' comments and the TC feedback to strengthen your final paper.

The final camera-ready paper must be uploaded to the ICASSP 2026 paper submission site by January 28, 2026. Please note that you are not allowed to make substantial changes to the reviewed paper except for those which address specific reviewers' comments and improve the paper. Additional authors cannot be added; however, the order of authors can be revised if needed. We reserve the right to use the accepted version of your paper if we believe that the updated version differs substantially from the version that was initially accepted. The revised paper has a maximum length of 4 pages, plus an optional fifth page for references only, following the style in the Author Kit at https://cmsworkshops.com/ICASSP2026/papers/paper_kit.php. Papers that do not conform to the official style may not be published.

At least one author MUST REGISTER for the conference at the Author Full Conference rate by February 13, 2026. Failure to have such registration will result in the removal of the paper from the Technical Program. The format of the on-site presentation will be announced at a later stage, once author registration is complete.

If you require an invitation letter confirming you are an author on an accepted paper, you may request one here: https://cmsworkshops.com/ICASSP2026/author_invitation_request.php

Please also note that the session assignment for ICASSP 2026 will be based on thematic connections between the topics of the papers and does not reflect the quality of the paper. Information on the exact scheduling of your paper will be available when the ICASSP 2026 Technical Program is posted on the conference website.

We believe that ICASSP 2026 will provide an excellent platform for disseminating your research to a broad global audience, and we anticipate a record number of attendees in Barcelona, Spain, reflecting this year's record number of paper submissions.

Dear Guangrui Fan, Menglin Zhang, Minxia Zhao, Lihu Pan,

Paper ID: 10330
Paper Title: LEPER: LABEL-FREE EDGE POLARITY REWEIGHTING FOR HETEROPHILY

The paper presentation schedule has been announced on the ICASSP 2026 website. Please take this time to check your presentation schedule:

Session: MLSP-L24: Multimodal and Diffusion Models for Signal Processing
https://cmsworkshops.com/ICASSP2026/view_session.php?SessionID=1028

Session Format: Oral

Session Time:
Thursday, 7 May, 14:00 - 16:00

Please follow the author presentation instructions available at:
<https://2026.ieeeicassp.org/author->
